# § 437.32 Effluent limitations attainable by the application of the best conventional pollutant control technology (BCT).

Except as provided in 40 CFR 125.30 through 125.32 or §437.30(b), any existing point source subject to this subpart must achieve the following effluent limitations representing the application of BCT: Limitations for BOD<sub>5</sub>, pH, and TSS are the same as the corresponding limitation specified in § 437.31.

#### § 437.33 Effluent limitations attainable by the application of the best available technology economically achievable (BAT).

Except as provided in 40 CFR 125.30 through 125.32 or §437.30(b), any existing point source subject to this subpart must achieve limitations representing the application of BAT: Limitations for copper, zinc, acetone, acetophenone, 2butanone, o-cresol, p-cresol, phenol, pyridine, and 2,4,6-trichlorophenol are the same as the corresponding limitation specified in §437.31.

[65 FR 81300, Dec. 22, 2000, as amended at 68 FR 71023, Dec. 22, 2003]

#### § 437.34 New source performance standards (NSPS).

Except as provided in §437.30(b), any new source subject to this subpart must achieve the following new source performance standards: Standards for  $BOD_5$ , pH, TSS, copper, zinc, acetone, acetophenone, 2-butanone, o-cresol, pcresol, phenol, pyridine, and 2,4,6trichlorophenol are the same as the corresponding limitation specified in § 437.31.

[65 FR 81300, Dec. 22, 2000, as amended at 68 FR 71023, Dec. 22, 2003]

### § 437.35 Pretreatment standards for existing sources (PSES).

Except as provided in 40 CFR 403.7. 403.13 or §437.30(b), and no later than December 22, 2003, any existing source subject to this subpart must achieve the following pretreatment standards: Standards for o-cresol, p-cresol, 2,4,6trichlorophenol are the same as the corresponding limitation specified in § 437.31.

[65 FR 81300, Dec. 22, 2000, as amended at 68 FR 71023, Dec. 22, 20031

## §437.36 Pretreatment standards for new sources (PSNS).

Except as provided in 40 CFR 403.7 or §437.30(b), any new source subject to this subpart must achieve the following pretreatment standards: Standfor o-cresol, p-cresol, 2,4,6trichlorophenol are the same as the corresponding limitation specified in § 437.31.

[65 FR 81300, Dec. 22, 2000, as amended at 68 FR 71023, Dec. 22, 2003]

## Subpart D—Multiple Wastestreams

## § 437.40 Applicability.

(a) Except as provided in §437.1(b), (c), or (d) or in paragraph (b) of this section, facilities that treat wastes subject to more than one of the previous Subparts must comply with either provisions of this subpart or the applicable provisions of Subpart A, B, or C. The provisions of this subpart are applicable to that portion of wastewater discharges from a centralized waste treatment facility that results from mixing any combination of treated or untreated waste otherwise subject to Subpart A, Subpart B, or Subpart C of this part only if a facility requests the permit writer or control authority to develop Subpart D limitations (or standards) and establishes that it provides equivalent treatment as defined in §437.2(h).
